

Job Title: Senior Application Engineer(UI Developer)

Senior UI Developer

Are you passionate about creating exceptional user interfaces that power enterprise-grade applications? Join our global team where you'll leverage cutting-edge UI technologies to build innovative solutions that drive business success. As our Senior UI Developer, you'll architect scalable frontend systems, mentor team members, and collaborate across global teams to deliver impactful products.

About the Role

As a Senior UI Developer, you'll be the technical cornerstone of our product development lifecycle. You'll collaborate with Product Owners, Business Analysts, and UX teams to architect, implement, and maintain sophisticated user interfaces that meet business needs while delivering exceptional user experiences.

Key Responsibilities

- **Architect and implement** scalable, high-performance UI solutions across multiple products
- **Lead technical strategy** for frontend development, ensuring maintainability and performance
- **Establish and enforce** coding standards, design patterns, and reusable component libraries
- **Collaborate across global teams** with both internal and external stakeholders
- **Mentor junior developers** and provide technical leadership within cross-functional teams
- **Evaluate and integrate** emerging frontend technologies through proof-of-concept initiatives
- **Optimize performance** and ensure accessibility compliance in all UI implementations
- **Manage application lifecycle** from planning through delivery, including risk assessment and task prioritization

About the Team

Our team is the global L&H Reinsurance Engineering team, responsible for the technical Architecture and Engineering of IT solutions for Reinsurance business unit. The team members are passionate about technologies in building enterprise grade products with a deep understanding of reinsurance business. We closely collaborate with other teams and colleagues around the globe to share knowledge and engineer solutions.

Growing experience will, over time, give you a broad view on Architecture & Engineering of a global reinsurer and enable you to have a comprehensive understanding, people and systems involved and how these systems shape business outcomes. This will allow you to build up an excellent foundation for a next career step in a role closer to the operational business activities in our global organization.

About You

You're a forward-thinking UI expert who thrives in collaborative environments. You approach challenges with creativity and pragmatism, balancing technical excellence with business needs. Your resilient personality enables you to navigate change effectively while mentoring others. You're passionate about creating elegant, efficient solutions and continuously expanding your technical expertise.

We are looking for candidates who meet these requirements:

- 10+ years of experience in UI technologies
- Expert-level proficiency in HTML5, CSS3, JavaScript (ES6+), TypeScript, and frontend frameworks (React.js preferred)
- Strong understanding of UI architecture, component-based development, and state management (Redux, Context API, MobX)
- Proven experience architecting large-scale, component-driven applications

- Experience defining design systems and maintaining component libraries

These are additional nice to haves:

- Experience with testing frameworks (Jest, Cypress, Playwright) and CI/CD processes
- Familiarity with cloud-native architectures (AWS, Azure, GCP) and DevOps practices
- Knowledge of progressive web apps, server-side rendering, and headless CMS integrations
- Understanding of security best practices and data privacy compliance
- Contributions to open-source UI frameworks or community engagement
- Experience with high-performance, data-intensive UI applications
- Understanding of insurance/reinsurance business
- Strong communication skills and ability to work effectively across cultures and geographies

We are an equal opportunity employer and value diversity at our company. We do not discriminate based on race, religion, color, national origin, gender, including gender identity or expression, sexual orientation, age, marital status, veteran status, or disability status.

Our company has a hybrid work model where the expectation is that you will be in the office at least three days per week

About Swiss Re

Swiss Re is one of the world's leading providers of reinsurance, insurance and other forms of insurance-based risk transfer, working to make the world more resilient. We anticipate and manage a wide variety of risks, from natural catastrophes and climate change to cybercrime. We cover both Property & Casualty and Life & Health. Combining experience with creative thinking and cutting-edge expertise, we create new opportunities and solutions for our clients. This is possible thanks to the collaboration of more than 14,000 employees across the world.

Our success depends on our ability to build an inclusive culture encouraging fresh perspectives and innovative thinking. We embrace a workplace where everyone has equal opportunities to thrive and develop professionally regardless of their age, gender, race, ethnicity, gender identity and/or expression, sexual orientation, physical or mental ability, skillset, thought or other characteristics. In our inclusive and flexible environment everyone can bring their authentic selves to work and their passion for sustainability.

If you are an experienced professional returning to the workforce after a career break, we encourage you to apply for open positions that match your skills and experience.
